#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☒ Responsive to communication(s) filed on 11 May 2005.
- 2a) ☒ This action is **FINAL**.                      2b) ☐ This action is non-final.

### DETAILED ACTION

1. The amendment filed May 11, 2005 has been entered.

#### *Claim Rejections - 35 USC § 103*

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1, 9-16, 18 and 23-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Holland (US 6,887,014) in view of Ross et al (US 2004/0055746).

Holland discloses a robotic apparatus and method for treatment conduit comprising a lateral device housing; an anchor device to secure said housing to an inner wall of one of a plurality of lateral pipes (2), the lateral pipe which intersects with a main pipe (1), wherein the lateral device being anchored in the lateral pipe, a work tool (13) being powered from onboard said lateral device (10), wherein the work tool may be a rotary bit cutting tool in which a rotating arm supporting said rotary bit cutting tool is spring biased against the inner wall of the against pipe, or a hole saw cutting tool, or a grinding device including spring tensioning that automatically adjusts a cutting diameter of the grinding device to the size of the inside wall of the lateral pipe, or an electrically generated signal source, wherein said work tool is an attachment adapted to drag a liner up into said lateral pipe from the main pipe, a state of said

Art Unit: 3673

work tool is determined based on local decision-making from on board the lateral device (col.12, lines 25-43), the power supply (3) being connected remotely via umbilical (5b). (see Figs. 1-25; col.5, lines 20-68; col.6, lines 1-43).

However, Holland fails to disclose or fairly suggest the local power supply onboard the lateral device to provide power to the work tool.

Rose et al discloses a subterranean well completion incorporation downhole-parkable robot (26) including an onboard rechargeable battery (30) (see Figs. 1-2; paragraph no. [0034]-[0038]).

Therefore, in view of Rose et al, it would have been obvious to one of the ordinary skill in the art at the time the invention was made to replace the power supply with the onboard rechargeable battery in order to enhance the movability of the lateral device within the lateral pipe and avoid the umbilical's entanglement while in moving to the lateral pipes.

#### ***Response to Arguments***

4. Applicant's arguments with respect to claims 1, 9 and 27 have been considered but are moot in view of the new ground(s) of rejection.

#### ***Conclusion***

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3673

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jong-Suk (James) Lee whose telephone number is (571) 272-7044. The examiner can normally be reached on 6:30 am to 3:00 pm, Monday thru Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Heather C. Shackelford can be reached on (571) 272-7049. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
